Introduction

Welcome to the world's largest collection of free, manually labeled human brain image data!

Please cite the following article and this website when making use of Mindboggle-101 data:
[101 labeled brain images and a consistent human cortical labeling protocol](#)

Arno Klein, Jason Tourville. *Frontiers in Brain Imaging Methods*. 6:171. DOI: 10.3389/fnins.2012.00171

All data below are also included in [Synapse project pages](#), and except where noted, all data are licensed under a Creative Commons License: 

as nifti volumes (nii), vtk surfaces (vtk), and FreeSurfer files (mgf, etc.).

You can find out more about the data from the [table of subjects](#), information [about the scans](#), scan [sources](#), lists of [labels](#), and the [log of changes](#).

Mindboggle shape measures for brain structures:

Alzheimers Disease Big Data DREAM Challenge 1

- 1. Overview
 - 1.1 Steps to Participate
 - 1.2 DREAM9 Challenges Rules
- 2. Incentives
- 3. Data Access
- 4. Data Description and Format
 - 4.1 Training
 - 4.2 Ancillary
 - 4.3 Test - ROS/MAP
 - 4.4 Test - AddNeuroMed
- 5. Questions and Scoring
 - 5.1 Timelines
- 6a. Leaderboards
 - 6.1 Submitting Results
 - 6.1.1 Making submission via the web
 - 6.2 Q1 Leaderboard
 - 6.3 Q2 Leaderboard
 - 6.4 Q3 Leaderboard
- 6b. Final scoreboards
 - 6b.1 Final submissions
 - 6b.2 Q1 Final Scoreboard
 - 6b.3 Q2 Final Scoreboard
 - 6b.4 Q3 Final Scoreboard

Alzheimer's Disease Big Data DREAM Challenge #1

Launched: June 2, 2014

Closed: October 17, midnight Pacific Time

See [Description of Final Results](#)

The goal of the Alzheimer's Disease Big Data DREAM Challenge #1 (AD#1) was to apply an open science approach to rapidly identify accurate predictive AD biomarkers that can be used by the scientific, industrial and regulatory communities to improve AD diagnosis and treatment. AD#1 will be the first in a series of AD Data Challenges to leverage genetics and brain imaging in combination with cognitive assessments, biomarkers and demographic information from cohorts ranging from cognitively normal to mild cognitively impaired to individuals with AD.

The Challenge considered the following questions:
